

SOFTWARE ONLY · NO COMMITMENT

Maximum's Travel Risk Management, with your current insurance.

Every trip prepared: risk in four dimensions, providers, formalities, the gap with your policy and a Duty of Care Brief read and confirmed by the traveller, following ISO 31030 guidelines.

- ✓ Unlimited trips and briefs
- ✓ No commitment
- ✓ Your insurance stays in place

THE OFFER

One price per traveller, unlimited trips and briefs.

THE PRICE

69 USD

per traveller per month

Unlimited trips and briefs · no commitment · billed monthly

That is USD 828 a year.

- ✓ Unlimited trips, with a Duty of Care Brief for each one
- ✓ Risk in four dimensions from dated official sources, providers checked, formalities
- ✓ Brief in your brand and your company's own template: your advice, your addresses, what to do or see
- ✓ Proven reading, timestamped PDF, three questions: "ready to travel"
- ✓ The gap between your current policy and what each stay requires
- ✓ Evidence file and ISO 31030 reading grid
- ✓ Your insurance stays in place: no cover, no certificate

THE BRIEF, IN YOUR BRAND

Everything duty of care requires, and everything you want to add.

 **Your brand**

Your logo and colours on the brief page, its PDF and the email to the traveller: Maximum, co-branded or 100% your company.

 **Your template**

Welcome note, internal contacts, recommended addresses, advice, what to do or see: your template comes back in every brief.

 **The ISO 31030 core**

Verdict, risk, providers, formalities, insurance, questions and traces are regenerated from the sources: your template adds to them, never replaces them.

 **The bond with your travellers**

The brief becomes the company's care for the person leaving, read to the end and kept.

No insurance cover, no certificate, no claims: your current policy stays in place, and the cockpit shows for every stay the gap with what the stay requires.

THE SOFTWARE'S 13 FUNCTIONS

HR and every traveller, in the same space

Dynamic risk mapping and scoring

Every destination assessed with dated sources, reviewed when advice changes.

Inclusive profiles and vulnerabilities

The traveller confirms their needs privately; HR only see the confirmation.

Cyber and information risk

Devices, VPN, Wi-Fi: the stay's cyber guidance, read before departure.

Provider risk management

Hotels and airlines checked; a blocked provider prevents approval.

Entry and posting formalities

A1, visa, passport, mission statement: prefilled and tracked until HR validation.

Open Booking · off-channel bookings

A ticket booked outside the agency? The traveller imports it into their stay.

Business / Leisure separation

Personal days are declared; location sharing pauses on those days.

Hierarchical approval workflows

A reasoned go-ahead; high risks need two approvers, including leadership.

Briefings and learning acknowledgements

Destination guide, guidance and a three-question quiz; reading is time-stamped.

GPS tracking, geofencing and PNR

Planned places on the map; position only when the traveller shares it.

Crisis messages, Check-in and SOS

Stay thread, check-in and SOS; management is alerted at once.

Near-miss reporting

A near-miss is reported and followed through to the corrective action.

Audit trail and integrity log

Every action dated and attributed, SHA-256 chained, exported with a manifest.

ISO 31030

The 22 recommendations, in 7 steps: the detail is in the Duty of Care factsheet.
