

Travel cover for your travellers, in your name.

Agencies, platforms, concierges and TMCs: offer cover through the tools your travellers already use. Choose which services you keep and which you entrust to us.

Your use cases

1 I offer cover with the trip

In your quote, during booking or through an adviser's link: clients find your brand when enrolling.

2 The widget must fit our website

Logo, colours, typography, buttons, spacing and layout: adapt enrolment to your booking journey.

3 Travellers should see our name after purchase

With Maximum White-label, the Pass, documents and insured area extend your identity after booking.

4 Our members travel several times a year

Present annual cover in their member area. Benefits and renewal conditions are explained before enrolment.

5 We manage a company's travel

Combine your business travel service with Travel benefits, certificates and assistance access for employees.

6 I want a team to handle claims

With Maximum White-label, travellers file through a branded module. The claims team reviews documents and follows the case.

7 We keep the relationship in our own tools

With Maximum White-label, your widgets and insured data through the API or CSV/JSON exports stay connected to your own tools.

8 Our trips involve particular destinations or activities

Confirm covered activities, eligibility and programme limits before offering insurance to your clients.

INTEGRATION

Cover fits into your journey.

You choose the moment, the location and the colours. Two integration examples, followed by other possibilities.
